

Welcome to Dairy Science Park 2017 at Konya !!!!

Welcome to Konya, the city of Mevlana Rumi, in Turkey to participate in the 4th International Conference and Industrial Exhibition on Dairy Science Park (DSP) scheduled on 1-5 November, 2017, at Selçuk University.

The event is continuation of the series held during November 2011, 2013 and 2015 at Peshawar, Pakistan. The three conferences focused on rehabilitation of the post-flood Dairy Sector, Halal meat export potential of the Region and entrepreneurship-based hygienic food production respectively. The fourth event of the series is being held with the theme “Achieving Food Security through Entrepreneurship Development and Biorisk Management (BRM)”.

Pakistan’s Khyber Pakhtunkhwa and FATA are rich in livestock resources valuing US \$10 billion; however, these could neither provide good economic return to producers nor quality food to consumers because of poor management. Similar wastage of natural resources is being observed throughout the developing world. DSP addressed this issue through academic, developmental, business, and marketing interventions. The model has got some notable achievements and further developments are in pipeline. The United Nations have accepted DSP as #SDGAction9671 and it may prove a model for bringing prosperity to the people of the developing nations.

We expect rich participation of people from Academia, Industry, Civil Society, Government and Development Agencies, from various parts of the world. It is hoped that this event will prove as a great opportunity for Academia-Government-Industry linkages and a union between the people of the East and West at the historic and spiritual city of Konya.

Scope of the workshop

Dairy Science Park has emerged at the University of Agriculture, Peshawar as a platform to engage the youth in productive economic activities through applied research and industrial linkages. Technological gaps between various regions of the world, success stories, entrepreneurship development, quality control protocols, traceability of livestock and livestock products and BRM concerns need to be shared. DSP aims at innovation, industrialization and commercialization of livestock farm resources for ensuring access of the people to certified quality foods and self-employment generation for the youth.

DSP 2017 is an event for researchers, scholars, engineers, resource managers, students, policy-makers, and all others interested in entrepreneurship and BRM in livestock and poultry based food value chain supported by hygienic and Halal standards. The workshop provides an excellent platform to network with colleagues worldwide to share knowledge and experience on teaching, research and industrial linkages in food industry.
